

Vorbearbeiteter unlegierter Werkzeugstahl geeignet zum Nitrieren und Flammhärteten geglüht, Festigkeit max. 207 HB

Breite und Dicke vorbearbeitet

Verwendung: Maschinenbau, Formenbau
Lehrenbau, Apparatebau

Kennzeichen: Plattenende weiss

Acier à outil non allié, pré-usiné recommandé pour nitruration et trempe au chalumeau recuit, résistance max. 207 HB largeur et épaisseur pré-usinées

Applications: construction mécanique, de moules, de jauge et d'appareils

Couleur: fin du méplat blanc

Richtanalyse: C 0,46%

Si 0,25%

Mn 0,70%

Analyse moyenne:
